During the past week there has been made in Bristol District a discovery which promises to be an important benent to Pioche. As we have stated in a previous issue, on the authority of Superintendent Roe, a body of ore, which is very rich, and is supposed to be also of great extent, has been found in the

Cave mine. Although, in the strictest sense of the word, the Cave cannot be said to be one of our local mines, yet the success or failure of its owners, as as if it were in reality in Ely District.

among the miners with regard to the mines, or at least the supposed mines of San Juan, near the southwestern corner of Colorado. The distance from here is, we understand in the vicinity of 400 with the fact, usually reasons thus: · Nothing that is of any great value can be had without great pains and labor: such and such a district is a long distance from me, and the way is hard; required to reach it, if I reach it I must be richly rewarded. To prove that it is from Hamilton. As in all other camps by such a train of reasoning that prospectors usually conclude to travel, we recommend to the reach it I must be richly rewarded. To prove that it is from Hamilton. As in all other camps on this coast, Mr. Hayes finds many friends in Pioche. He will remain in town several days. have but to refer to past excitements, with regard to both placer and quartz Never does an Autumn pass over the heads of a mining community without bringing with its snow-flakes an excitement with regard to some distant district. However, out of these excitements good comes to some. Our wishes to those who have gone from among us to those who have gone from among us to the new mines are that they may find golden fortunes. May those who have gone, and those who are to go, remember their fellow workers of Pioche. MEADOW VALLEY.

Incline 3 has been sunk to the depth of 1,000 feet, where the 10th station is now being opened. When the station shall have been completed, drifting will be commenned from it, and the sinking of the shaft will be continued. The west drift from the 9th station is in 180 feet; the east, from the 9th, 287 feet; the east from the 8th, 373 feet. Incline 5 has n completed to a depth of 834 feet. bottom, as well as that of No. 3, is in hard quartzite, which, however, blasts well. From incline 7 the west drift at the 8th level is in 504 feet; the east from the 4th, 104 feet; the west from the 3d, 116 feet. There has been little or no change either in the character of the ore or in the quantity taken out.

PIOCHE. At the old works there are now on the dump 40 tons of ore, assorted and ready for the mill. During the week the breasts in the stopes have been very hard. For this reason not as much ore hard. For this reason hot as much ore has been taken out as usual. The car-samples of the ore now on the dump give the exceedingly good average of \$174.50 to the tou. The new shaft measured 370 feet in depth pesterday morning. Dur-ing the past week the contractors made more progress than during any previous period of the same length. They suc-ceded in going down 25 feet. The bot-tom of the shaft is still in a shale forma-

SPRING MOUNTAIN TUNNEL.

Three shifts of men continue the work f sinking the shaft, the bottom of which is now 140 feet below the tunnel. It is expected that ledge No. 2 will be cut within 10 or 15 feet from where the men are now working. Ledge No. 3 will then be reached by a cross-cut. The indications with regard to the ledges about to be cut are considered very good. WASHINGTON & CREOLE.

Stoping upward to the level above will then be commenced. The prospects of the mine are better than heretofore.

CAROLINE. The sinking of the shaft continues through hard rock. All the rock through which the men have passed during the week has been hard. To-day will be fin-ished a contract which will make the depth of the shaft 425 feet. Another contract for 100 feet has been let, so that the work will continue uninterruptedly.

CHIEF OF THE HILL. A progress of 10 feet has been made in the cross cut at the 360-foot level. The rock in the face of the drift has been very hard for the last week, but is becoming softer. A further distance of 12 feet has been run, since our last report, in the west drift.

CHIEF EAST EXTENSION. On Wednesday the sinking of the main shaft was resumed at a depth of 225 feet. The ledge at the bottom of the shaft is regular and well defined. It is, in width, about 3 feet, 6 inches of which, along the foot wall, is rich ore.

ALPS. Work has been suspended for a few days, for the purpose of repairing the engine which is out of order. The ap-pearance of the mine, when the work-men quit, was very promising. The face of the drift was in quartz, showing mineral.

CONDOR.

On Monday last work was resumed in the Condor mine at the depth of 160 feet. The shaft is being sunk on the ledge, which is three feet wide. Appearances indicate the proximity of a good body of ore at present. BAYMOND & ELY.

The incline is now 345 feet deep. In the west drift, at the 280-foot level, a considerable quantity of very fine ore has been found. In the upper levels a large quantity of low-grade ore is in sight.

quantity of low-grade ore is in sight.

The face of the southwest drift at the 30-foot level, which is in 145 feet from the shaft, shows a ledge a foot in width. The ore in the ledge is very good, and the ledge is very well defined.

We are Indebted for the facts in the case, says Watson figured as a boisterous character in Eureks, Belmont, Pioche and Cornucopia during the past Summer. While out this way he is supposed to have sailed under the name of Rains. He may have been here, but if so we never heard of him.

BOWERY.

DAILY RECORD is the sinking of the shaft, which is done with as much expedition as practible. PORTLAND.

During the past week, bullion to the amount of \$2,000 was shipped by the company. It was .873 fine. NEWARK. The Amador mill is still crushing New-

ark ore. There are no new develop ments to report. STILL SINKING The Pioche Phenix and Ivanhoe com-panies are still sinking their respective shafts.

NOTHING BETTER. There can be no more pleasant and profitable way of passing leisure hours than by reading the current news of the day. No man can hope to keep pace with times unless he is fully posted on current events. There-fore go to Wiederhold's and get a supply of newspapers, periodicals and pictori-

HEALTHY. -The bracing atmosphere of such, is as closely allied to our interests this climate has a very healthful effect. Very few of the population are now in There is considerable excitement the care of physicians, excepting such as may have met with violence or encoun-tered some foe of the human family. Those who take proper care of them-selves can hope to enjey good health in this place.

Base Line.-Many are of the opinion miles. The snow has fallen over part of that Pioche is further south than it really the road, and is about to fall upon the is. Pioche is directly east of Mount Diremainder of it. This makes the excitement so much greater. The prospector, though he may deny it if you charge him to the constant of the con of the office of the Nevada Central Rail-road Company, near the head of Meadow Valley street.

PERSONAL .- J. J. Hayes, of the house of Giles, Hayes & Co., San Francisco, therefore, as great pains and labor are wholesale dealers in all kinds of wines

NEW PHOTOGRAPH GALLERY, -- Messes Sutterley & Fox, photograph artists, are about opening a gallery on Main street, over Ike Phillip's grocery store. Mr. Satterley is among the pioneer photo-graphic artists in Virginia City, if not the first who ever began sbeh a business on the Comstock range.

COLD WEATHER -Yesterday (although the sun shone brightly.) the air was decidedly cool and bracing. Night before last ice formed a quarter of an inch thick in the rear of our office. Lines dusters and broad-brimmed hats are at a ruinous discount; heavy clothing is in demand.

PROSPECTORS. - R. S. Wright and about a dozen others, whose names we did not learn, departed yesterday for the San Juan country. They go to seek their fortunes. Peace and success be with them.

In yesterday's paper we erroneously mentioned Mrs. C. C. Barstow as the mother of Mrs. D. M. Tyrrell. Mrs. B. bears to the last named lady no other relation than that of friend.

RAYMOND & ELY VS. KENTUCKY .- On Monday (to-morrow) it is expected that Judge W. H. Beatty will be here to pre-side over the great mining suit. The case is set for that day.

SERVICES AT THE EPISCOPAL CHURCH To-Day. - Morning service at eleven o'clock. Sunday school at 2 p. m. Evening service at half-past seven. Henry L. Badger, Rector.

County Finances.-The quarterly report of the County Auditor and County Treasurer will be found under the head of "New To-day."

Ick formed here shortly after sunset

yesterday evening.
